- II. Claims 25-27, with a technical feature of a fusion protein comprising a substantially nonglycosylated HIV envelope protein.
- III. Claim 32, with a technical feature of a method for treating a patient by administering a composition comprising a vector encoding an HIV envelope protein, which is substantially nonglycosylated; and

Applicant elects the subject matter of Group I (Claims 1-24, 28-31 and 36) without traverse. Applicant notes that the subject matter of Groups I and IV are related to each other as product and process of making the product. Similarly the subject matter of Groups I and III are related to each other as product and process of using the product. When product claims (for

example, one or more of claims 1 or 28) are found to be allowable, Applicant respectfully requests rejoiner of process claims (32 and 35) that are dependent, or otherwise include all of the limitations, of the allowed product claims as required by MPEP §831.04(b).

Applicant reserves the right to prosecute the subject matter in the non-elected claims, originally filed claims, or any other claims supported by the specification in one or more continuing patent applications.

Applicant elects Group I without traverse (claims 1-24, 28-31 and 36). Applicant believes that the application is now in condition for substantive examination.

Respectfully submitted,
